

Localising SDGs through Local Government Green Growth Development Strategy @ Prix Municipality , Thailand

Mr. Suriya Yeekhun
Mayor of Prix Municipality,
Sadao, Songkhla,
Thailand

From Policies to Practices

- Pongmaha municipality has applied the concept of Sustainable Green Growth Development and good governance through partnership beyond the administrative boundary for being a Livable City Project.
- The local authority has tried to work via “partnership-based” and to shift from “local government-based” to “Local Governance Green Growth Development- based ”.

(1) Institutional governance

This main component includes:

- (I) Providing many channels to communicate and to allow the local accessibility through municipality's (transparency)**
- (II) Setting the complain system for local people to response and feedback via informal meeting (accountability)**
- (III) Handling the task through the partnership among all actors i.e. via Community Organisation Councils and partnership among all actors (participation)**

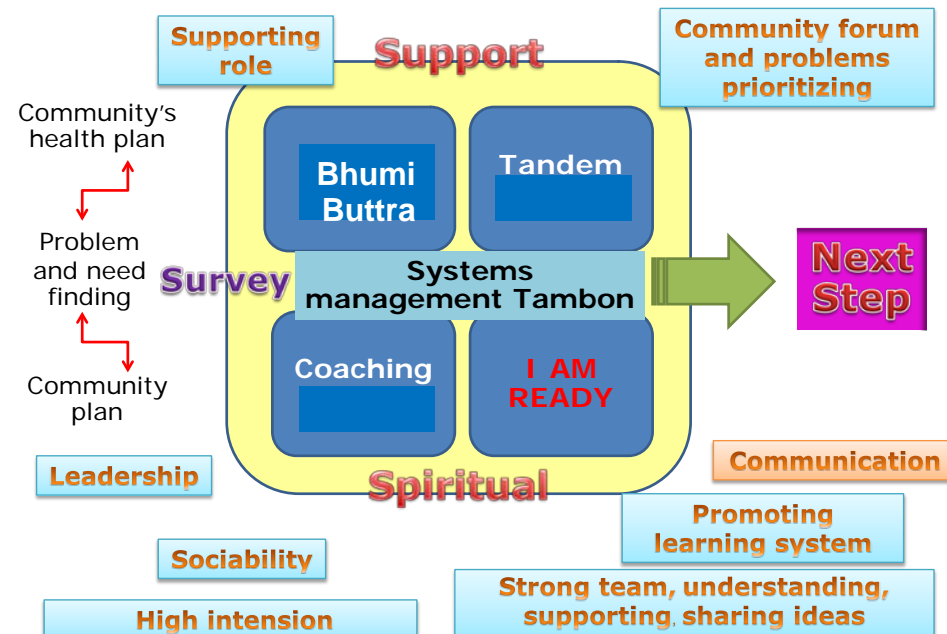

(2) Flexible Administrative Style

“Prax administrative system” includes

- (i) Coaching project consists of
 - (a) Bhumi Buttra, (b) Tandem and (c) Coach
- (ii) Building up the understanding, knowledge, and awareness concept.

(3) Green Growth Strategy

Prik Municipality and its communities expanded activities and applied Sufficient Economy through out :
Bring better local policies design concerning 7 main key areas to carry on the Sustainable Cities and Communities (G11) through environmental management issues -

- Water, (G6)
- Waste,
- Forest,
- Disaster,(G13)
- Food Security, (G1,2)
- Energy,(G7)
- Networking and Partnership (G17)

G6 Clean Water & Sanitation

G7 Clean Energy

G13 Climate Change Action

G17 Partnership for the Goals

Some households are also changing their eating habits – the percentage of household spending on fruit and vegetables carrying the organic label has increased over the past couple of years

G1 No poverty
G2 Zero Hunger
G3 Good health /Well being

- Municipalities can lead the way by supplying environmentally sound public services and infrastructure to foster the transition to sustainable consumption.
- Greening Household Behaviour provides insights into what people think and actually do about pursuing greener lifestyles.
- Green growth is the way to sustain growth and development over the long-term.

- Encouraging people to factor the environment into their everyday lives is leading to more sustainable consumption and households 'going green'.
- Less waste and households water consume are use efficiently.
- People are ready to make compromises to green their lifestyles.
