

Diesel trucks are large contributor to CO2 and PM emissions across Asia

Source: Clean Air Asia, 2012.
Accessing Asia

Green Freight and Logistics Program

Green Freight and Logistics aims to reduce the environmental impact of the movement of goods through supply chains

Cleaner Trucks

Vehicle technology, fuel, driving practices (public-private)

Cleaner Logistics

Fleet improvement, data collection, mode shift (private sector efforts)
Improved infrastructure (public sector efforts)

Green Supply Chain

Reduce the transport inputs to product lifecycle emissions, improve transport service to eliminate waste and inventory in supply chains
