CDIA's contribution to the implementation of SDG 11

- Make cities and human settlements inclusive, safe, resilient and sustainable -

Local authorities will have to be involved in the implementation of the SDGs in order to achieve 65% of the targets.

Localizing SDGs

Advocacy: To ensure that people and institutions are aware about the SDGs and have the capacity to engage actively

→ What is localization in the city's and country's context?

Ownership: To enhance commitment of National and Local Governments as well as Civil Society Organizations to engage into concrete discussions and action on the means of SDG implementation to set it in the local context

→ What can we do to localize the SDGs through our work? Strengthen individual and organizational capacity? Build supporting partnerships?

Policy Integration: To facilitate and stimulate the discussion with stakeholders on the alignment and integration of the New Urban Agenda and the SDGs

→ How can we define successful localization and what are possible indicators and timelines to monitor progress?

Financing: To discuss with national and local leaders as well as donors and financing institutions ways of mainstreaming the SDGs into their budgets and plans at their respective levels and to discuss innovative financing solutions

-> Innovative financing solutions for sub national partners – approaches to modern resource mobilization and advocacy for SDG-based planning- and budgeting?

What is CDIA?

CDIA is an international partnership initiative, established in 2007 by the Asian Development Bank and the Government of Germany, with additional funding support from the governments of Austria, Sweden, Switzerland, and the Shanghai Municipal Government.

CDIA contribution

to implementing and financing of SDGs by supporting cities and LGs in:

- Supporting the identification of infrastructure investment projects related to SDG 11
- Closing the infrastructure financing gap by mobilizing domestic and international financial resources and public-private partnerships for sustainable urban infrastructure projects
- Closing the capacity gap by supporting organizational learning in and between local governments
